SECTIONAL DOORS

TAILOR-MADE PRODUCTS

A garage door is one of the most important elements of finishing the house. It impacts both the look of the building itself and the comfort of the people living there. The door should be functional, warm, safe and aesthetically fit the facade.

VENTE K2 RC

Narrow embossment is a popular design matching house of different styles. One of the advantages of such embossment is a profitable ratio of price to high quality.

ROLLING DOORS AND SIDE DOORS

WIDE VARIETY OF VENEERS

Rolling door is the constructional solution which allows to install the door in the garages, where we want to have the maximum free space directly under the ceiling in non-standard garages and utility rooms. The door opens vertically upwards, and the curtain after rolling fits into the box inside or outside the garage above the entrance.

Side garage doors, matching the main doors in colour and embossment type allow to enter the garage without opening the main door. There is a possibility of covering all door elements with a veneer and using matching decorative elements for the facade to look well. Available in two versions: single and double-leaf doors.

FINE FINISHING

Final visual effect of the sectional garage doors is obtained by selecting colour, veneer for the shell embossment, and the texture of the panels. KRISPOL doors are available in six textures. To emphasize the individual character of your house, use suggested decorative details of a high-quality stainless steel. Decorative details of flat surface can be used in VENTE K2 RFS garage door and its look can match the decorative elements of the house entrance doors.

PRACTICAL SOLUTIONS

A garage is not only a place for parking a car. It sometimes serves as a room that requires additional facilities and practical solutions. A perfect addition to the garage door is the lateral door or built-in service door. It gives the possibility of entering the garage through a narrow threshold. The wheeled objects can go through the door and there is no need to open the whole garage door. You will also find a variety of additional items in our offer: glazed aluminium sections or windows in different sizes and shapes providing more light into the garage, ventilation grilles, bolts and locks. The gate can come with an ergonomically shaped knob or handle on both sides.

SEALING
IN PERIMETER

3

DOUBLE-LIP
SEALING

KRISPOL sectional doors have one of the best thermo-insulation properties in the market: $U = 1,12 \text{ [W/m}^2\text{K]}^*$, and it is only $U = 0,9 \text{ [W/m}^2\text{K]}^*$ for the warm doors VENTE K2 RFS 60. The doors are made of panels 40 or 60 mm thick and they are filled in with polyurethane foam and sealed along the whole perimeter and between the sections. We have also added two 'lips' at the bottom sealing between the panels and the ground. The shape of the upper arch has been designed in such a way to optimally press the upper panel of the door to the lintel. The warm door VENTE K2 RFS 60 is made of thicker panels and is equipped with double sealing of the bottom panel, intersectional panels and additional perimeter sealing which levels the thermal bridges between the walls and the angle iron.

SOLID CONSTRUCTION

No matter how good the garage door looks outside, it cannot be forgotten that it must be a solid work. Thus, it is worth checking the interior look. The door mechanism is equipped with solutions strengthening the construction, facilitating the assembly in the garage, guaranteeing reliability and aesthetic look from inside. Every door is equipped with central hinges, additionally strengthening the construction. We offer 6 types of track systems, including low SL that requires the lintel of only 8 cm. We are able to offer the solution for almost every type of a garage. All metal elements are protected against corrosion. We are one of the few producers in the market who paint the lateral hardware inside the sectional door the colour fitting the panels colour.

COMFORTABLE SERVICE

HOME
AUTOMATION

EASY TO OPERATE

A comfortable garage door is easy to use, reliable and quiet. The comfort of use is provided by reliable automatics. The mechanisms used in our products are provided by the best and the most renowned producers. An easy and non-problematic use is guaranteed and the door can be installed in any "intelligent home" system and with alarm installations. The rolls with bearings are used in sectional doors. We have minimized the number of connections in guiding rolls. Thanks to these solutions the doors work quietly and smoothly. Each garage door produced by KRISPOL can be easily opened with one hand irrespective of the door size. It is facilitated by two torsion springs enabling the optimal door balance.

SAFE USE EVERYDAY

We constantly enhance our products by implementing solutions increasing user's safety and protecting the mechanism work. Every sectional garage door is equipped with an additional protection to stop the door from falling if the spring breaks. The drive systems include the overload switch which lifts the door of approximately 10 cm, if the obstacle is found. The automatic garage door can be equipped with a photocell, blocking the door from closing, if the obstacle is found within its clearance. The rolls installed in all doors can additionally be equipped with shields to protect fingers. Sectional door panels have been designed to obtain a safe shape.
